## ***New WD Series Motors***

To our distributors:

We are pleased to announce the release of new WD series motors.

The WD motor series is an economical solution for medium duty applications requires high torque. It has smaller outline yet still provides high efficiency across a wide performance range. Its integral check valves and a provision for a case drain reduce pressure on internal seals to improve product life. The compact package is suitable for industrial and mobile applications including car wash brushes, food processing equipment, conveyors, machine tools, agricultural equipment, sweepers, skid steer attachments, and more. Additional product information can be found on our website:

Please contact your local White Drive Products representative for additional product support or to address any special requirements.

Very truly yours,

Helen Shen
